

Head Out

Drag me out and help me to stand up
The roads are full the traffic is squeezing me
Grab your stuff I will show you a place
Where the world's beauty has another face

Make me believe things are alright
(I believe they are)
Make me believe we are alright
This place is just too full and too loud
Let's go let's head out

Follow me up there is the street
Leading us to the world that we dreamed to find
Come with me together we'll make it
Don't hesitate or we'll still wait in line (wait in line)

Make me believe things are alright
(I believe they are)
Make me believe you are alright
This place is just too full and too loud
Let's go let's head out

Make me believe things are alright
(Finally they are)
Make me believe you are alright
Constructions cars noises make us shout
Let's go let's head out
